

## TECHNICAL DATA

# Super Pac™

## Drilling Fluid Enhancer

**Description:** Super Pac™ is an easy mixing, liquid polymer that enhances the properties of a bentonite drilling fluid. When added to Hydraul-EZ® or Super Gel-X®, Super Pac™ creates an ideal fluid for drilling in a variety of conditions.

**Recommended Use:** This multifunctional polymer is designed for use as a drilling fluid additive for inhibition of clay and shale, minimizing fluid loss to the formation and increasing viscosity for cuttings transport and suspension.

**Characteristics:**

- Reduces fluid loss in permeable formations.
- Provides filtration control in both fresh and saltwater.
- Inhibits the hydration of clays and shale.
- Increases viscosity of drilling fluid.

**Mixing and Applications:** Mix at low shear through a mud hopper. Add 0.5 to 1 quart per 100 gallons of existing bentonite drilling fluid for hole stabilization.

**Packaging:** 1-gallon jugs, 6 jugs per case or 5 gallon pail, 32 per pallet.
