

ALLCO BITUMEN FILLET

BITUMEN FILLET

With the Allco Bitumen Fillet it is possible to obtain watertight roof corners without leaving any waste material. The Bitumen Fillet also works on rounded corners for concrete structures, for example on bridges.

The Allco Bitumen Fillet is simple, easy and quick to install.

FEATURES & BENEFITS

- Quick and easy to install
- Permanent high elasticity at temperatures between 15°C and +90°C
- Perfect adhesion to many different construction materials such as plywood and concrete
- Light weight

USES

Allco Bitumen Fillets are used with the Casali Torch On range for rounding corners on roofs under the bitumen membrane. It can also be used as cant strip on bridges as a corner fillet of the bridge deck and side beam under the waterproofing bitumen membrane.

SURFACE PREPARATION AND APPLICATION:

The surface shall be dry, clean and free of oil. The surface shall be primed with an approved bitumen primer. Cut the fillet to the required length. Melt the sacrificial protective PE cover by torching or hot air welding. Press the fillet securely into the corner. The installation of the waterproofing membranes can proceed immediately.

DIMENSIONS:

30mmx30mmx40mm

Length: 1.1 m

PACKAGING:

28 strips per box

Weight: 21kg
